

Vasyl Khreptak

Unity Developer

Summary

I am a Unity Developer with 2.5 years of commercial experience in game development. I specialize in gameplay programming, project architecture, optimization, and scalable systems design. I have experience working with both traditional Unity workflows and Unity DOTS/ECS through personal and experimental projects. Passionate about solving complex programming challenges, I continuously explore new technologies and game development workflows while building performant and maintainable systems.

Skills

■ Good. Unity 2D/3D, C#, Zenject, VContainer, DoTween, UniRx, NavMesh Agents, A* Pathfinding Project, BRP/URP, Google Ads, Google Play Services, Firebase, Unity Localization, Push Notifications, JetBrains Rider, Git, ParrelSync, UniTask, NiceVibrations, NewtonSoft, PS4/PS5 platforms, Addressables, New Input System, TextMeshPro, Trello, ClickUp, Slack.

■ Satisfactory. Shader Graph, HDRP, DOTS, Steam Audio, Cinemachine.

■ Base. Adobe Photoshop, Premiere Pro, Illustrator, Blender, Audacity, FishNet, Photon PUN.

Experience

Midnight Works

Lead Unity Developer

July 2025 - April 2026 (10 months)

- Reviewing candidates test tasks and providing technical feedback;
- Participating in technical interviews and being responsible for the technical evaluation process;
- Assisting team members with architecture decisions, optimization, and code quality improvements;
- Designing and maintaining reusable project template to accelerate development;
- Coordinating with designers, artists, and programmers to ensure smooth technical integration;
- Identifying technical risks and proposing solutions during production;
- Assisting in profiling and optimization of gameplay systems and overall project performance.

Interests

🎮 Making and playing games

❤ Watching a day in life of a game developer

🔧 Solving problems about architecture, programming and algorithms

Languages

🌐 English(B1)

🌐 Ukrainian(Native)

Portfolio

👛 gamedevportfolio.tilda.ws/

Unity Developer

June 2024 - July 2025 (1 year 2 months)

- Reskinning and adapting existing game projects;
- Implementing new gameplay mechanics and features;
- Working with legacy codebases and maintaining old systems;
- Developing and optimizing projects for PS4 and PS5 platforms;
- Profiling and optimization of gameplay systems and performance;
- Collaborating closely with designers, artists, and programmers in a team environment;
- Refactoring and improving existing architecture and code quality;
- Debugging and fixing platform-specific issues;

Career Break(personal goals)

September 2023 - March 2024 (7 months)

- Completed a relatively large pet project;
- Learned and applied new architectural approaches;
- Learned FishNet and created an FPS multiplayer game in 10 days;
- Created and tested a bunch of self-written tools;
- Learned and used a group of plugins;
- Finished diploma thesis;

Utin Computer

Unity Developer

March 2023 - August 2023 (6 months)

- Prototyping;
- Implementing mechanics;
- Debugging;
- Code refactoring;
- Teamwork;

Education

Lviv Polytechnic National University

Bachelor's degree, Information systems and technologies

September 2020 - June 2024
